PROFESSIONAL SUMMARY

Computer Science and Engineering undergraduate with hands-on experience in AI/ML through the Intel Unnati Internship. Experienced in developing and testing software applications and machine learning solutions, including a phishing website detection system. Strong foundation in Software Engineering, Data Structures and Algorithms (DSA), Problem Solving, and AI/ML, with a passion for building scalable and impactful solutions.

EDUCATION

GITAM University

Bachelor of Technology in Computer Science and Engineering – CGPA: 8.36/10.00

Bengaluru, India

Aug 2022 – Apr 2026

TECHNICAL SKILLS

Programming	Python, C++, SQL, JavaScript (ES6+)
Web Development	React.js, FastAPI, Node.js, REST APIs, WebSockets
QA & Testing	Functional Testing, Regression Testing, Integration Testing, API Testing, Test Case Design, Defect Tracking, Debugging, SDLC, STLC
AI/ML	Machine Learning, Deep Learning (ANN, CNN), Model Selection, Data Preprocessing, Feature Engineering
Tools & Frameworks	Git, Scikit-learn, TensorFlow, Selenium (Basics), Docker (Basics), Postman, VS Code
Databases	MySQL
Concepts	OOPs, DBMS, Operating Systems, Computer Networks, DSA
Soft Skills	Problem Solving, Analytical Thinking, Communication, Team Collaboration, Adaptability

EXPERIENCE

Intel Unnati Industrial Training – AI/ML Intern

May 2025 – Jul 2025

Intel India | Team Lead

Remote

- Led a 4-member team in building an end-to-end AI/ML pipeline covering data preprocessing, model training, evaluation, and deployment.
- Implemented and evaluated classification models including Random Forest, XGBoost, and Logistic Regression to improve predictive performance.
- Integrated machine learning backend services with frontend applications using FastAPI and React.

PROJECTS

InventoTrack | React, Node.js, Express.js, MongoDB

2026

- Developed a full-stack inventory management system using React, Node.js, Express.js, and MongoDB to streamline product and inventory management.
- Integrated Stripe payment gateway with secure webhook-based transaction verification.
- Designed and executed 60+ manual test cases covering functional, integration, and payment workflows, achieving a 93.65% pass rate.

Phishing Website Detection System | Python, Scikit-learn, FastAPI

2025

- Developed a machine learning-based phishing website detection system using Python, Scikit-learn, and FastAPI.
- Engineered 20+ URL-based features and trained a Random Forest classifier on 10,000+ samples, achieving 96.4% accuracy.
- Implemented data preprocessing, feature extraction, model evaluation, and REST API integration as part of an end-to-end machine learning pipeline.

CERTIFICATIONS & ACHIEVEMENTS

- Solved **250+ Data Structures and Algorithms** problems on LeetCode, strengthening problem-solving and analytical thinking skills.
- Earned the **Software Engineer Intern Certificate** from HackerRank.
